

Dear Hiring Manager,

I am writing to express my interest in the Senior Smart Contract Engineer position at Gnosis/Circles. With my experience in blockchain technology and decentralized finance, I believe I am well-suited to contribute to your innovative team and help drive the development of the Circles protocol on Gnosis Chain.

As the Lead Developer at African Blockchain Center, I have spearheaded several groundbreaking projects that align closely with the goals of Gnosis/Circles:

1. I led the Dokuma project, where we built an on-chain deed management system for the Zimbabwean government. This experience demonstrates my ability to develop complex blockchain solutions with real-world applications, much like the Circles protocol aims to do.
2. I developed a multichain wallet system supporting 8 chains, showcasing my proficiency in creating interoperable blockchain solutions. This aligns well with Gnosis Chain's position as an Ethereum-compatible network.

My technical skills closely match your requirements. I am proficient in Solidity, Node.js, and various backend technologies. I have extensive experience designing and implementing secure, efficient smart contracts and developing scalable backend systems for high-traffic applications.

Furthermore, my track record of winning multiple hackathons, including the Encode Safari Hackathon and HackFS Hackathon, demonstrates my ability to innovate rapidly and solve complex problems under pressure. These skills will be valuable in researching and proposing innovative solutions to enhance the Circles protocol, especially in areas of scalability and user experience.

I am particularly excited about the opportunity to work on a decentralized web of trust based social currency systems. The concept of personal currency issuance and trust networks aligns with my passion for leveraging blockchain technology to create fair and social economic systems.

Thank you for considering my application. I am eager to contribute my skills and experience to Gnosis/Circles and help shape the future of decentralized finance. I look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Hamid Adewuyi
